## SEE THE BIRDS CLOSE UP

– observe the birds at close quarters with the Eva Solo Window bird feeder

Most people love the sight and sounds of garden birds, and it's nice to be able to feed them and thus help our small feathered friends survive the winter.

The new **Eva Solo Window bird feeder** is designed for mounting directly on the window-pane so you can observe the birds close up. The **bird feeder** is made of frost-proof glass and is held in place on the outside of the window with double-sided tape. Elegant and discreet, the transparent semi-circular sphere brings the feeding birds right up to your window, allowing you to enjoy the sight of them from the warmth of your living room. The aperture in the semi-circular glass sphere is just the right size for small birds to perch and eat to their hearts' content – without being elbowed out of the way by larger species.

The feeder is easily removed from the window and placed in the dishwasher so it can be kept nice and clean all year round. The window bird feeder is another ingenious supplement to **Eva Solo's** extensive **Outdoor** collection.

### **Eva Solo Window bird feeder**

- Frost-proof glass, plastic and stainless steel
- Diameter: 143 mm
- Price: 44.95 EUR
